

Panel Glide Blinds Applications and Advantages

Panel Glide system provides a contemporary method of obtaining privacy and sun protection in both domestic and commercial installations. This new and innovative shading solution for large windows, sliding doors and bi-fold doors, looks fabulous in ultra modern or traditional interior design schemes.

What make the Panel Glide Blind so unique is the wide panels that effectively reflect and filter daylight. When open, the panels stack neatly behind one another allowing maximum light into the room. Sliding the panels into the closed position creates a complete fabric screen providing light control and increased privacy.

Panel Glide Blinds will transform any room with its cultured, sophisticated look. Select from our huge range of quality block out or translucent light filtering fabrics, giving you better light control and enhancing your room's ambience.

Blackout, light filter & sunscreen fabric: Set the tone of the room with colour, mood and light control.

Tracking system: The benefit you get from the roller mounted carrier system is a lightweight blind that is easy to operate. The track is very slim and discrete.

Optional timber or aluminium battens: You have the option to add lacquered cedar, stained cedar, painted timber or aluminium battens. Create the look you want for your home, either casual or formal.

Removable panels: You can change the colours of your panels to give your home a new look simply and easily, whenever the mood takes you.

Optional Pelmet: Add a touch of elegance to your Panel Glide with our exclusive pelmet. The pelmet infill is co-ordinate with your chosen Panel Glide fabric and provides a stylish modern finish for your room.

Most of the new homes built in Australia these days have large windows or door combinations. They look amazing and give us the best opportunity to take advantage of a great view or even just a little court yard. The only problem with having such large amounts of glass is which type of blind is the best choice for coverage, insulation and design.

A great solution for these types' window and doors is [Panel Glide Blinds](#). They are a modern take on the old vertical blinds. They are made up of overlapping panels of fabric that slide easily along a simple head rail track system. There are numerous track layouts available including left stack, right stack and centre opening, so there is a solution for all situations.
